Ivins City Staff Report
City Council Meeting 08/7/2014

Agenda Item: Approval of expenditure for Pictometry Aerial Photography

Submitted by: Charles Gillette, P.E., City Engineer

Recommended City Council Action:
Approve expenditure of $7,202.50 for Pictometry aerial photography.

BACKGROUND:
Pictometry is an aerial photography company working with Washington County to provide photography for developed areas of the County. A flight was completed in 2009 paid by the County and provided to Ivins at no cost. Ivins participated in 2012, sharing the cost with Washington County to receive upgraded high definition aerials (each pixel representing 4-inches), LiDAR topographic data. Staff desires to participate in the 2014 aerial photos similar to 2012 to receive even higher definition aerials (3-inch pixels).

FINDINGS AND ANALYSIS:
These aerials are tremendously helpful in maintaining accurate maps and exhibits, and developing land use and utility plans. This cost was anticipated and budgeted for the current fiscal year. Since LiDAR is not needed this year, the costs are less than 2012 which were $10,100. This year the costs will be $7,202.50.

SUPPORT MATERIALS:
- Sector Map

FINANCIAL IMPACT:
Costs will be split between the following two general ledger codes, as per the approved budget.
GL 51-42-744: $3601.25
GL 52-42-744: $3601.25

Respectfully Submitted:

Charles Gillette, P.E., City Engineer
