Ivins City
Engineering Report to City Council
August 14, 2014

Center Street Widening: The project became completely open to traffic on Friday, August 8th, just in time for the first day of school the following Monday. There is another coating of paint required to be installed in 30 days from the first coat before the project can be declared complete.

NRCS Mitigation Main Street Outfall: It may be necessary to delay these projects as consultation with US Fish and Wildlife is recommending that the work not start until October due to desert tortoise concerns even though no tortoise habitat exists in the area.

Red Mountain Dams Rehabilitation Evaluation: The draft Environmental Assessment should be released for a 30 day public comment period very soon. After the 30 day public comment period it is hoped that the document can be finalized depending on how fast US Fish and Wildlife can prepare the biological opinion. After this environmental process is completed, the project would then proceed to the process of preparing a design.

Center Street Trail Lighting: Bollards have been delivered to the Public Works yard. Staff is working with the Ence Electric to execute the contract to start installation of the bollards. Ence Electric has indicated that it will start the work at the end of the month.

Blue Sky Solar Project on Firehouse: The solar panels are installed and connected and are now producing power. A ribbon cutting ceremony is being planned for Heritage Days in September.

Irrigation Master Plan: Staff is working on updating the irrigation master plan and to improve the implementation plan of bringing the system online over the upcoming few years.
