Date: **October 8, 2014**
To: **Mayor and City Council**
From: **David Glenn, Public Works Director**
Re: **Bus Route and Tentative Stops**

The original proposed bus route through Ivins will not meet the time frame to allow for transfers at the Sunset transfer station. The Mayor, Councilman Densley, and I recently spent several hours riding different route options with SunTran. After several different routes were discussed, driven, and timed, it was found the best route that meets the time frame for the transfers is the route marked on the attached map. This route also depicts several options for bus stops, but these stops are not final and are dependent upon timing. This proposed route not only meets the timing for transfers, but opens the door for St. George to expand this route to the Bloomington Walmart giving our citizens additional shopping options.

The bus routes SunTran runs in St. George are considered 40 minute routes, meaning every 40 minutes the bus service leaves the transfer stations. The length of the route is actually closer to 30 minutes, with the additional time used for pickups, drop offs, wheelchair patrons, and time to make transfers at the stations. The proposed route on the attached map is in the 32-33 minute range which according to SunTran, will suffice.

A public open house to discuss the proposed route and stops is tentatively scheduled for November 19th between 10:00 a.m. and 6:00 p.m. here at City Hall. This is a Federal requirement since FTA funds are being used for the bus service.

Ivins City Bus Route and Tentative Stops
