Public Safety Department
March 5, 2015 City Council Report

Police

SCI PD had for the month of February 358 calls of service, 100 arrests, and wrote 112 citations. We also served a search warrant on a residence in Ivins that produced a small amount of Heroin and Paraphernalia. Charges to 2 adults consisted of Possession of Heroin, Possession of Paraphernalia, and Child endangerment. All chargers were enhanced because of proximity to a local church.

EMS

Total calls for February	47
Ivins City calls	39
Santa Clara calls	8
VA Hospital calls	11
Transported	33
Cancelled or refused treatment	14

There were 3 new Paramedic positions and 2 new AEMT positions filled.

Fire

Training- The first department monthly training consisted of an After Action Review and equipment cleaning after the response to the structure fire on 580 S. 200 E. Operations and tactics were discussed as well as safety concerns and lessons learned.

The department's second monthly training was a Hazardous Materials training night. The department set up a hazardous materials decontamination tent and checked equipment and supplies needed for a hazmat response.

Significant Events- Fire personnel responded to a structure fire on 580 S. 200 E. on January 31.

On Saturday January 31, 2015, at 00:43 hours Ivins City Fire received a page to respond to a structure fire at 210 East 580 South. Initial information received was this was the address that was responded on earlier and flames were visible through the roof. No one is known to be at home.

First arriving units, Medic 121 Ivins Ambulance and Chief Hancey, arrived to find large amounts of smoke and visible flames through the roof. Flames and smoke appeared to be over the kitchen and living room areas and extending to the upper level. Command was established and assistance was requested from Santa Clara and St. George Fire Departments. Truck 121 and Engine 121 arrived and established a water supply. Truck 121 set up its' ladder on the alpha side of the home, and began to spray water on the roof with the aerial monitor. A crew with a 2 1/2' hand line pulled a line to the alpha delta side of the home. Engine 121 established it's own water supply and pulled a hand line on the bravo side of the home and extended the line to the door near the living room/ kitchen area. Engine 32 and 34 from Santa Clara arrived and set up operations on the charlie and delta sides of the home. Crews reported there was fire extending into the rear addition section of the home. Two more hand lines were established from Santa Clara Fire and St. George Fire Department.

Fire operations continued in defensive mode to continue to knock down the flames. Fire appeared to have extended into all main floor areas of the home. Visible smoke and fire was emitting from the attic roof area. Smoke was visible from the upper level soffits, eaves and vents. Fire crews continued spraying

water from hand lines and monitoring for hot spots. After flames were extinguished, fire crews continued to monitor smoke and hot spots.

Fire crews were later able to begin overhaul operations in the interior of the home. Fire Crews entered the home from the door on the bravo side of the home. The ceiling and roof areas were exposed to rafters. Crews were able to enter and hit hot spots and smoke areas. Another crew was able to enter the home from the front door and proceed to the upper bedroom level of the home. Crews were able to find areas of heat and smoke and extinguished these areas. Crews pulled ceiling and exposed rafters.

The interior of the home received extensive fire, smoke and water damage. All areas of the main floor and upper level of the home had fire extension. The addition on the Charlie side of the home also received fire damage in the roof and ceiling areas. Crews were able to extinguish and monitor these rooms from the exterior of the home through the windows.

Rocky Mountain Power was notified to drop the power line from the power pole located on the Charlie delta side of the home. The line was disconnected from the home and removed from the site. All utilities, power, water and gas were shut down.

Before leaving the premesis, the property was cordoned off with fire line marking tape. The property was also monitored by a police officer. The Utah State Fire Marshal's office was contacted during the course of the fire. Deputy Fire Marshal Hohbein arrived later that day to investigate.

Equipment- A new large diameter intake valve was ordered and installed for T121. This is the main intake valve for water supply. The valve is leaking due to corrosion from hard water and is unable to be repaired. E121 will need a new intake valve in the next 6 months.
