# Cantera Cliffs

## Project Theme

The proposed Cantera Cliffs subdivision will consist of 14 single family lots circling a single cul de sac road. The homes are to be constructed in a manor harmonious with the surrounding neighborhoods. The homes will be stucco and tile construction. A 10' wide asphalt path will be installed along 400 West Street and a 5' wide sidewalk will connect 200 North Street along the north boundary in the provided landscape buffer areas.

The project slopes gradually to the west and drainage will be conveyed through the historical location, to a proposed detention basin, and eventually to the low point of drainage in Tenaya Drive and 535 West Streets. Existing sewer and water are located in 400 West Street.
