Ivins City Staff Report
City Council Meeting 06/18/2015

Agenda Item: Approve expenditure in the amount of $6775.00 for extrication equipment for the Fire Department.

Submitted by: Bob Flowers

Recommended City Council Action: Approve expenditure in the amount of $6775.00 for extrication equipment for the Fire Department.

BACKGROUND: This proposal is for the purchase of extrication equipment for the Ivins Fire Department. The equipment is a Holmatro brand Combi tool and pump with a 32 foot hose. The pump is approximately two years old and in excellent condition. The equipment is available through TecResQ a Holmatro sales rep.

Ivins Fire is seeking to acquire this equipment to provide more effective extrication capabilities for the citizens of Ivins. The current extrication equipment is not reliable and crews often experience mechanical failure when in use. The addition of this new equipment would give Fire Department personnel the ability to use reliable, easy to operate equipment without wondering if it is going to work. The Holmatro equipment is a combination cutter/spreader tool which allows for a variety of uses during light extrication and search and rescue operations. This new equipment has a simple to use single hydraulic hose which saves time during set up and allows for a greater working range during operation.

The acquisition of this equipment would greatly enhance Ivins Fire Departments' capacity to perform in rescue operations. Personnel would feel more confident and comfortable to use this tool in emergency operations. This equipment would be reliable, easy to set up and use, saving precious time in an already stressful operation.

This is a single resource vendor – one quotation is attached from TecREsQ, LLC.

FINANCIAL IMPACT:
This expenditure was budgeted in FYE 2015 budget – 10-57-740, Capital Outlay. Salaries.
