Suntrans Bus Ridership Report, Ivins Route #5

10/9/2015

As expected, bus ridership picked back up in August and September. What was not necessarily expected was that the ridership surpassed old weekly and monthly ridership records. The previous weekly record ridership was 406 back in March. Since mid-August, the only week that was less than this amount was the short week due to no bus service on Labor Day.
