June Monthly Report

Since my last report for May we have had the following:

86 total EMS Patients

- 52 transported
- 34 treated and released
  - 60 in Ivins City
  - 24 in Santa Clara City
  - 2 in St. George
- M-121-total 82
- M-122-total 4

We have implemented some new vasculature access called the Bone Injection Gun or B.I.G. This takes place of the EZIO which is significantly less expensive and easier to deploy.

We have gone through all of our EMS supplies and inventoried it. This has allowed us to reduce cost and improve our inventory tracking.

The moral of Ivins City Ambulance Service employees has improved dramatically I am proud of the hard work and dedication that these men and women have shown to our community.

Mckinzie Tobler NREMT-Paramedic
EMS Director
