Flooding – 1	Structure Fire - 1

Total calls for service = 22

Ivins Fire Report – Aug 2016

Trainings this month consisted of confined space searches, self-rescue, and a hazmat response drill with the full assembly of the regional HazMat Tent and decon stations. These are critical tasks with a very high level of risk. It is our goal to conduct one of these drills each quarter instead of the yearly planned ones due to the low frequency of actual use versus the potential risk.

Significant calls for service:

On August 20, 2016, at approximately 6:40 PM, Ivins Fire responded to a report of a brush fire near Motoqua. On arrival we found a fire approximately 50 acres in size, and spreading rapidly. State and Federal assistance was limited as the majority of their resources were already assigned to fires throughout the state. Ivins Fire remained on scene and engaged the fire in suppression activities and structure protection throughout the night and into the following day. The fire was contained to just over 300 acres the following afternoon and we were released as additional resources arrived on the fire. This detail was a long assignment and was above and beyond for our crews and their efforts lead to the quick suppression and control of the fire which held off the loss of structures and evacuation of Motoqua.

On August 20, 2016, at approximately 2:00 PM, Ivins Fire and EMS responded to a Search & Rescue call off of Old Highway 91, near Warm Springs. A hiker had fallen from a cliff and had sustained serious injury including compound fractures where her fractured bone had broken through her skin. Ivins Fire set up an Incident Command and called for Life Flight assistance. Washington County Search & Rescue sent in their high angle rescue team with Ivins personnel to hike into the patient and provide care throughout the rescue which lasted 4 ½ hours.

On August 22, 2016, Ivins Fire responded with Ivins EMS to a report of a traffic crash with injuries. Four patients given medical assessments with one patient transported to DRMC. Fire used extrication equipment to access the badly damaged engine compartment to cut the battery cables due to a gas and fluid leak.

On August 23, 2016, Ivins Fire responded to a report of a structure fire in Ivins. Lightening had struck a home and it was unsure if it had started a fire. On arrival we found a damaged roof where it had been struck by lightning and sustained structural damage. No fire was found and it was monitored throughout the night.
