Suntrans Bus Ridership Report, Ivins Route #5

2016 Third Quarter Report,
10/13/2016

The following chart shows the up to date monthly ridership:

We are noticing a decreasing trend of ridership. Much of this decline can be attributed to Tuacahn High School, which now provides an independent bus service for students. It may be sensible in the future to remove the Tuacahn bus stop either entirely or partially where it would only include the stop during times of the day corresponding with the school start and end times.

Five County Association of Governments has indicated that they would be willing to help us obtain an 80% grant for a bus stop shade structure for Rocky Vista University. Here are some pictures of a couple of structures that were recently installed in St. George, one installed at the Harmons and the other at Lins.

We have asked Rocky Vista for easements and cooperation on the project and they have indicated interest in cooperating and perhaps even contributing a concrete slab to help cover the 20% match requirement.
