Ivins Fire Report – Oct. 2016

Trainings this month consisted of standard runs, fire apparatus maintenance, and report writing.

Significant calls for service:

Ivins Fire responded to a gas leak at 1500 East Split Rock Drive. On arrival we found that a contractor working after hours had dug up a gas main. Three Questar Gas crews had to respond and a large section dug up and replaced. Ivins Fire remained on scene until the gas line had been clamped.

Ivins Fire responded to a report of a structure fire located on 200 North in Ivins. On arrival we found a tree on fire in the resident's front yard. The homeowner had soaked a rag in linseed oil and stapled it to the tree in hopes of killing off the limb. The tree had caught fire and was extinguished by the Fire Department. The resident was unaware the tree had caught fire and stated he would not try the linseed oil rags again.

Burn Season is open and Ivins Fire has been busy conducting routine checks of the approved burns and providing assistance to citizens as needed.
