Re: City entrance sign design and selection

We recommend two options for a City entrance sign.

PREFERRED OPTION

We recommend the City approve the basic design (shown below) by Terry Marten for a City entrance sign on Highway 91 at the eastern entrance to the city that will include an appropriate message at its base, subject to the conditions below. This design meets the acquisition criteria in the Arts Master Plan, Appendix 3. We also recommend the same design be used for an entrance sign at the western entrance to the City on Highway 91.

ALTERNATE OPTION

If the City Council prefers to consider other designs, the City can issue an RFP for designs and bids. The Arts Commission should provide additional input as to the criteria that will be used to judge submissions. The approved submission should be subject to the conditions below.

CONDITIONS FOR EITHER OPTION

The City should set aside a small budget for City staff or hired experts to analyze engineering issues and to create a mock-up of the sign to ensure its size and design is appropriate for the location (topography, surroundings, etc.)
