Ivins City Staff Report
City Council Meeting 4/6/17

Agenda Item: Discussion of Ivins/Santa Clara Interlocal Sewer Outfall Agreement

Submitted by: Charles Gillette, P.E., Public Works Director/City Engineer

Recommended City Council Action:
This is for discussion.

BACKGROUND:
Ivins City and Santa Clara City share sewer trunklines that pass through Santa Clara before they connect to a regional sewer trunkline owned by St George located at Snow Canyon High School. The trunklines were installed per an agreement settled upon in 1990. The original trunklines are approaching full capacity and the capacity will need to be increased to accommodate growth within the next 6 to 10 years. This agreement is intended to update the original agreement and assign responsibilities for the line replacement and future maintenance.

FINDINGS AND ANALYSIS:
This agreement is based on the analysis from the recently adopted Ivins City Sewer Master Plan. Staff recommends that the City Council approves it.

The agreement has provisions for:

- Right-of-way and easement acquisition.
- Re-alignments through new subdivisions.
- Management of future projects and sharing of expenses.
- Maintenance of existing/future facilities.
- Rehabilitation of existing/future facilities.

SUPPORT MATERIALS:

- 1990 Sewer Agreement
- New Sewer Agreement with attachment maps.

FINANCIAL IMPACT:
Ivins City is committing to its share of costs as identified in the adopted Sewer Master Plan.

Respectfully Submitted:

Charles Gillette, P.E., Public Works Director/City Engineer
