Ivins City Staff Report
City Council Meeting 4/6/23

Agenda Item: Concept Plan Report for Dry Wash North, located at approximately 900 West and Kwavasa Drive. Kayenta Development-Owner/Applicant.

Submitted by: Mike Haycock, Building & Zoning Administrator

Recommended Action: No action is required for concept plans. This is an informational report only.

PURPOSE OF THE CONCEPT PLAN: A Concept Plan is the initial application to begin the subdivision process. Its purpose is to show Staff, the Planning Commission and City Council where the subject property is located and what the owner/developer is proposing. This is an opportunity for Staff to give some initial feedback to the owner/developer before they incur the costs of submitting a more detailed plan that is required for a Preliminary Plan application.

DISCUSSION: The Dry Wash North subdivision consists of a total of 27 lots on 14.76 acres. The land use is LDR (Low-Density Residential). The property is zoned RE-15 (Residential Estates Single Family minimum 15,000 sq ft). The Zoning Administrator determined that the application was complete and met the required zoning against the existing land use. Staff gave guidance on what is required for the Preliminary Plan. TRC reviewed the application on 3/28/23 and identified detention, storm drains and LID standards, floodplain, and sewer will be fully addressed at Preliminary Plan. A Sensitive Lands review may be done at their next application. They recommended the developer refer to all aspects of the General Plan in their design process. Planning Commission reported on this concept plan on 4/4/23.
