Some Ideas for Goals H, I, and J

Perry Brown

May 5, 2023

Since I cannot be at the May 16 meeting, I thought I would provide a few initial thoughts on these final three goals. Certainly, if I were in the conversation you all might have, I might have some different thoughts. I earlier gave Pam a few minor editorial comments on some items, but since she has these, they are not repeated here.

Hai, 6th bullet since the reservoir is already developed do we need to further develop it?

Hai, 7th bullet we likely just need to say assess the need for…

Ia I would argue for the phrase "community compatible businesses" there might be some better phrasing, but not just any kind of business would be appropriate in Ivins given the residential character of the city.

Iai, 4th bullet since the General Plan is a land use general plan by definition and this bullet is not related to land use as stated, it could be eliminated.

Iai, 9th bullet I suggest that effectively is a more appropriate word than efficiently. Efficiency is part of being effective, but it is not all of it. Effective=adequate to accomplish a purpose After making this change, we could drop bullet 5 since it says the same thing as this bullet

Ja1, 3,4,5 bullets Combine into one statement.

Jai, 6,7 bullets not related to land use so we can omit these two bullets.
