FIRE DEPARTMENT UPDATE: July 2023

Emergency Response: *134 Calls for Service*

- Engine 332 on a recent wildland deployment to eastern California. During the wildland season, your SCIFR firefighters will routinely assist jurisdictions in other parts of the country with their wildland firefighting efforts.

- On Friday, July 21, crews responded to multiple wildland fires. Engine 332, fulfilling the request for additional resources, was deployed to California. In the afternoon, Engine 331 responded to the area of Veyo for mutual aid assistance. Shortly after clearing the fire in Veyo, Engine 331 and Water Tender 31 were dispatched to The DI Ranch for a second fire start.

- Crews responded to medical aid in Snow Canyon State Park over the weekend for a hiker suffering from a heat-related illness. The hiker was found on the walking trail but was unable to make it back to their vehicle. This is just a reminder to stay hydrated and always take extra water with you even for routine activities. Personnel from the Ivins Center Street station arrived first on the scene and were assisted by St. George Fire Department and Washington County Search and Rescue.

- Crews responded locally to seven different fires in July and four under mutual aid, including vegetation and a commercial structure fire in St. George.
