Councilwoman Gillespie,

My name is Daniel Foster, I live at 193 S. Ivy Circle here in Beautiful Ivins.
I am writing this letter to you to ask you to consider discussing with the other City leaders the installing of "speed bumps" on 200 South, specifically between 100 West and Red Mountain Blvd. I have lived here since September of 2015, and I have seen a steady increase of vehicle traffic and along with that, vehicles traveling at unsafe high speeds, sometimes even failing to stop at the nearby stop signs at the intersection of Main Street and 200 South. 200 South is a very busy street, I've heard it described as a "feeder" street to Red Mountain Elementary School just to the east. On any given day I see children walking, riding bicycles, and scooters as they make their way to and from school, and the prospect of a terrible accident involving a reckless driver unfortunately may just be inevitable. I believe that the installation of speed bumps might help to reduce this risk. I have spoken with several of my neighbors, many of which have children of school age, and they agree.

Thank you for your consideration.

Best regards,

Daniel Foster
