Radio programming and system upgrade

A statewide project that has been several years was executed this past month. We have a few issues that we are working through. Most of the issues have been resolved at this point, we anticipate having the rest resolved in the coming days.

Medic 31

We experienced a factory issue in the way the box was mounted to the frame of the chassis. This is the ambulance that is on lease with the county. We anticipate having the repairs completed in the next week or two. Parts are on order and will be delivered soon.

Trunk or Treat

On duty crews participated in the Ivins City trunk or treat. We appreciate being included in the event and really enjoyed the time spent with members of the community.

Station Tour/ Safety Event

We had more than 80 first grade students and teachers from Santa Clara Elementary School attend Station 31. We had a fire safety message for them and toured them through the station and apparatus.

IV Fluids Shortage

There is a nationwide shortage of IV fluids from Hurricane Helene. The plant produces a large quantity of saline. Because of the shortage, there has been a 6- and 7-month extension to current stock, as well as a statewide directive on usage.

Burn Season

We are currently in our normal burn season for ordinary combustible type burning. The permits are issued daily depending on the burn index for the day. Additional information as well as obtaining a burn permit can be found on the following link: https://washingtoncity.org/burn/?category=burn

Chili Cookoff

We will be attending the annual Battle of the Badges chili cookoff event on Saturday. All are invited, the event will be Saturday morning around 9:00 and end just after noon.

Fire Prevention Event

October was fire prevention month; we held an event the last Saturday of the month which was well attended. We provided breakfast for the community. There were a couple of demonstrations of extrication and a dumpster fire.

PGA Post Event Discussion

We did a post event hotwash with both Ivins City and Santa Clara City. We did not find many needs for improvement from EMS and fire. We will make a few adjustments for future LPGA and PGA events.
