Hazmat- 1

**Burn Season/ Fuels Mitigation**

March update- 35+ large piles of burns in the Tuacahn Wash, ACE crews finished working in the project this past week. I met with the Flood Control Authority, Mosquito Abatement and native bird species groups to discuss upcoming projects. We have a large burn project southwest of Ivins that we are in the process of planning.

**Open Positions**

We have completed testing for the open positions, which was a major project for the whole department. We have offered 4 positions; three open and one that will be vacant in a couple of weeks. We are currently in the pre-employment phase for each of them.

**Events**

SCIFR staff did standby for bull riding event at Tuacahn this past weekend. This was a two-day event where we had two ambulances on standby each day.

True Grit, which is a two-day mountain bike event in the south hills area of Santa Clara and Ivins. The event started in Santa Clara, then west toward St. George, then west near the Nevada state line. There were two separate events, one for pro riders and the second for amateurs.  Because of wet weather, the event riders were much slower than in past years, which kept the injuries down.

**Wildland Refresher Training**

We have been working on our re-certification for the department members with a red card certification. This is about 12 hours of classroom, skills and physical fitness for each of our department members.
